

# Put **YOUR DATA** to work with Ero Health.

Having access to your *eClinicalWorks*® data and being able to use it in a meaningful way is critical to the success of today's medical practice. That data isn't always available in a straightforward manner, and many practices lack the workflows, entry protocols and knowledge required for good data analysis. Ero Health's Data Services team has a history of helping practices grow by harnessing the power of your *eClinicalWorks* data.

## Custom Reporting

Today's healthcare landscape requires sophisticated reporting of data, including ACO, MIPS, key financials and workflow monitoring. Ero Health can help you meet your reporting needs:

- Automated Quality Reporting to groups - Lightbeam, Navvis, Agilon
- Productivity - Biller, Front Office, Patient Throughput, Provider
- Clinical - Outstanding Orders, Encounter Follow-Up, Proactive Patient Communication
- Financial - Claim Follow-Up, RVU Financial Reporting, Patient Collections
- Quality - MIPS/MACRA, Best in Class, Health Grades

## Leaving eClinicalworks?

Accessing and extracting *eClinicalWorks* data in a usable format can be a challenge - but not for the Ero Health team. Ero Health will develop a plan to serve as your advocate with *eClinicalWorks* and execute the migration process:

- Categorize data, demographics, schedule, clinical data, patient documents
- Determine which discrete data to migrate
- Identify the summary data to extract from your system and document in PDF format

## Data Migration

There are many reasons practices need to migrate data, including acquisition, consolidation, and switching EHR systems. A successful migration requires careful planning and knowledge of the structure of your *eClinicalWorks* database to access the data and ensure that data is extracted and imported correctly. The Ero Health team has decades of experience working with *eClinicalWorks* and has a lengthy track record of accomplishing this. Migration projects may involve:

- Practice Information
- Clinical Data
- Patient Documents
- Automated Extraction of CCD Documents

## Automate Processes

Minimize the need for manual data entry in your practice. While eClinicalWorks does have some automation functionality built in, there's a lot more possible that can drastically improve your practice's efficiency. Ero Health has the knowledge to automate your eClinicalWorks processes:

- Identify how processes can best be optimized to meet the needs of the practice
- Create procedures that meet all Medicare or other relevant requirements
- Integrate the automated process into the practice's current eClinicalWorks system
- Provide training and support

## Grow Your Business

As the largest eClinicalWorks solution partner in North America, Ero Health has the expertise to help you maximize your investment in eClinicalWorks. Your business can run more efficiently and profitably. We can help you:

- Gain greater visibility to patient data
- Reduce overhead costs
- Improve patient and staff satisfaction

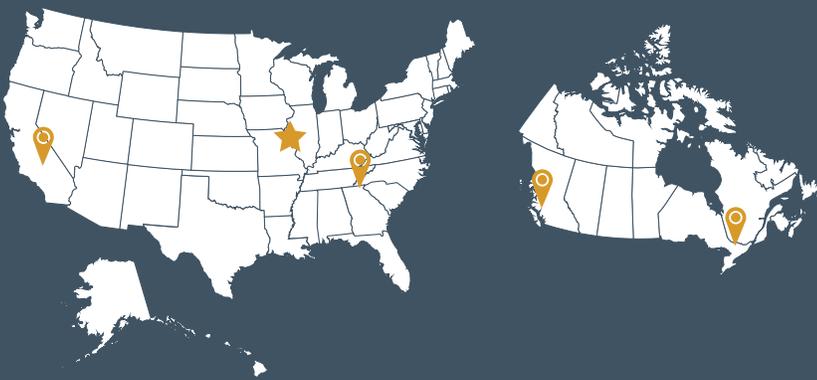

## Lab Device Integration

Imagine having the ability to allow your eClinicalWorks solution to seamlessly communicate with lab devices. This creates an automated environment which feeds all results and information directly into the patient record, eliminating delays, data entry requirements and opportunity for error. Practices that partner with Ero Health experience:

- Lab devices that integrate directly to send your EHR data
- Test results that automatically populate to your EHR
- A simplified workflow that saves hours of time

*Introducing Ero Health – a trusted partner ready to meet you at any point on your eClinicalWorks journey and lead you to success. We can help you navigate the new reality of healthcare and run your business more efficiently and profitably while working together to improve the lives of the people you serve.*

*Ero Health is the largest eClinicalWorks solution partner in North America that provides a full suite of digital health services to healthcare systems, clinics and physician practices. The firm focuses on helping practices gain greater visibility to patient data, reduce overhead costs and improve patient and staff satisfaction.*
